

Régrow

Activates root system of your crop

Regrow is formulated with phytohormones (Cytokinins, Indole Butyric Acid and Alpha Naphthalene Acetic), phosphorous, nitrogen and potassium, which are an adequate combination to form and restore roots in your crops, furthermore promotes active growth of plants. Stimulates and induces rooting, favors the thickening of stems, active growth and in general all plant metabolism. It is a root recovery for crops that have suffered root losses by any biotic or abiotic agent.

Packaging Presentation

Guaranteed Analysis

Total Nitrogen (N)	10,0%
Ammoniacal Nitrogen (N)	10,0%
Water-soluble Phosphorus (P ₂ O ₅)	50,0%
Water-soluble Potassium (K ₂ O)	8,0%
Contains Indolebutyric Acid and Phytohormone	
pH in 10% solution	4,5
Electric conductivity 1:200	4,98 dS/m
Solubility to 20°C	50,0 g/100ml

Benefits of using Rebrote

Stimulates and induces root growth in the nursery, transplant or the first stages of development.

Combination of rooting Phytohormones guarantee metabolic activation to promote root formation

Helps to recover roots in crops

Allow crop standardization after sowing.

Energetically activates the plant.

Activates hormonal dynamics and the nutritional capacity of the plants.

Increases ability to take advantage of nutrients

In order to increase nutrition efficiency, the recommendation must be generated by an Agricultural Engineer, based on soil and/or leaf tissue analysis. Likewise, the conditions of the soil, climate and phenological stage of the crop must be taken into account.
