

# Aquafull

Ensures the effectiveness of your application

**Aquafull SP** is an adjuvant developed to improve the physical-chemical characteristics of water, regulating the pH and reducing its hardness. This effect improves the instability of the mixtures, increases the effectiveness of herbicides, fungicides, insecticides and foliar fertilizers. It also protects mixtures from reactions that reduce the effect of said agrochemicals.

## Guaranteed Analysis

Active Ingredient	
Ethylenediamine Tetracetic Acid (EDTA)	64 %
3-Hydroxy-1,3,5-pentanetricarboxylic acid	34 %
Constituents ineffective as spray adjuvants	
Total	2 %
	100 %
