

Fluyex

Dispersant with ph buffer

Fluyex is a biodegradable non-ionic adjuvant, which has the ability to reduce the surface tension of water with excellent characteristics such as wetting, dispersing, penetrating, pH correcting and defoaming. Thanks to these characteristics, greater coverage of the surface area is achieved with the applied product, as well as an adequate effect of penetration, dispersion and adherence of the agrochemicals. This product can be used in the following settings: Agricultural, Aquatic (Wetlands) Forestry, Industrial, Municipal, Non-Cropland, Ornamental, Rights-of-Way and Turf.

Guaranteed Analysis

Active Ingredient	
Proprietary blend of nonionic surfactants, citric acid, trisodium citrate dihydrate and humectants	80%
Constituents ineffective as spray adjuvants	20%
Total	100%
