

Microkel 13% Fe Premium

High efficiency for activation and stimulation of your plants

Microkel 13% Fe Premium is designed to provide Iron in chelated form, in a highly efficient way to meet the requirements of said element, in each of the phenological stages of the crops. The stability of **Microkel 13% Fe Premium** guarantees complete assimilation of the element by the plant, compared to the elements found in their free ionic form, due to the various limitations that may exist in different types of soil for absorption and/or or fixation of said nutrients.

Guaranteed Analysis

Iron (Fe)	13%
13.0 % Chelated Iron	
Derived from EDTA Iron
